

Entering *California* from Oregon on Interstate 5

Note: This route has been tested and found to be accurate. **However**, it is not recommended during precipitation.

Using mapping software? Exit numbers and coordinates appear on software, **NOT NECESSARILY ON HIGHWAYS.**

California's Agricultural Inspection Station is located between the 2nd and 3rd exit south of the Oregon state line. **Please note: California does NOT use mile-markers on it's highways. They have just started to number the exits and very few have been completed.** The first exit in California is for the town of Hilt and is $\frac{7}{10}$ of a mile over the border from Oregon. The second exit, Bailey Road, is exactly 12 miles south of the border; the third exit, Ditch Creek Road, is 6 miles south of the border. The Ag station is located between the 2nd & 3rd exits. Unfortunately, there are no off-interstate roads connecting these two exits, therefore, you **must** exit at Hilt to get around the station.

Go southwest into the town of Hilt and continue south out of town on Hilt-Hungry Road. 6 miles later (9.4 miles from I-5), this road becomes Beaver Creek Road. 8.7 miles west, Beaver Creek Road turns south and follows Beaver Creek, crossing it several times. Once along Beaver Creek, the road is known as Beaver Creek/Forest Route 48NØ1.

The intersection of state highway 96 is 18.1 miles from Hilt. Turn left on Highway 96 (east) and follow it all the way back to Interstate 5 (17.5 miles), just south of Henley and 6 miles south of the Agricultural Inspection Station.

NOT RECOMMENDED IN POOR WEATHER

Total distance from exit to re-entry: 41.1 miles

NOTE: use your Adobe Acrobat magnifying glass to zoom in for details up to 800%.
